ITG

INTERNATIONAL
PRESENCE

OUR **OFFERING**

1 A comprehensive enterprise-class **cloud computing** and **managed services** portfolio, catering for different:
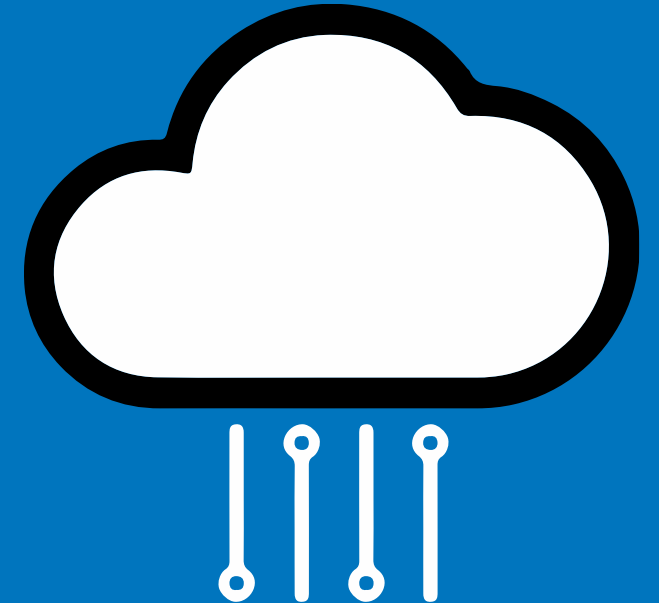

Service models

- Infrastructure : IaaS
- Platform: PaaS
- Software: SaaS
- Disaster Recovery: DRaaS
- Security : SecaaS

Deployment scenarios

Private, Public,
or Hybrid Cloud

2 Meeting **legal & compliance requirements**

CIRRUS

OUR **REFERENCES**

DIFFERENCE BETWEEN
PUBLIC CLOUD & CIRRUS CLOUD – TABLE

Our solution is designed to **meet your unique requirements** such as enhanced contractual requirements, customized capabilities, & enhanced network requirements

1

Data hosted in a secure Cirrus datacenter in Lebanon helps to ensure **data sovereignty** & is **not subject to the U.S. Patriot Act**

2

Take advantage of a consistent set of capabilities, whichever deployment method you choose—be it traditional or trendy, through an **in-country cloud** or into a public one

3

CIRRUS data centers support businesses by providing security, reliability, and accessibility

4

While management, redundancy, power backups, generators, & remote support severely tax **internal IT resources**, CIRRUS Cloud offers all these services without a hiccup

5

CIRRUS
